Customer Reviews

Gerry Roach started climbing in Colorado in 1955. Among his numerous accomplishments, Gerry is the second person ever to climb the highest peak on each of the seven continents. In more than 50 years of mountaineering, he has climbed in dozens of states and countries.

There is plenty of great information in this book. I appreciate all of the authors info and commend him on his achievements. Trailhead info and summit locations, mapped and written, are sure to be helpful leading one to a certain base camp. Actual summit routes are vague and this should not be your only guide for helping you reach your destination, especially when class 3 climbing or above is involved. The cost of this book troubles me. I paid \$25 for this item in very good condition, which it was. Many prices went well beyond that, even reaching over a hundred dollars! When I received the book, I noticed a stamped price on the back of \$14.95, whats up with that? I do not regret buying this item and encourage others to support this author, and adventurer. I am thankful for those who have taken the time to record their experiences for others to enjoy. To have info on every Colorado 14er in one collection is awesome. What an amazing feat for Gerry to conquer all these peaks. Just be sure to look elsewhere for a more reasonable price.

climbing the 14Ks in Colorado? this is the book to read Lots of info that I found very helpful good book and great author

If you want to conquer the 14ers of CO like I do, pick up this book. Roach did a fantastic job of detailing maps, directions to trail heads, etc.

I had the pleasure of using the map pack on a recent week of 14'er bagging. The maps are larger versions of the ones included in the second edition of the book. The back of the map contains detailed info on the "most popular" route. I currently use the original edition of Roach's book with the new map pack. Since the new color maps in the 2nd edition of the Colorado Fourteeners book do not photocopy well, the single page maps (approximately legal size) are more convenient than carrying the entire book. If you are a map fanatic like me, there is much to enjoy. Unfortunately, there is no geolocation data on these maps for GPS fanatics.
