Theory And Research For Academic Nurse Educators: Application To Practice

Synopsis

Theory and Research for Academic Nurse Educators: Application to Practice is an essential guide to nursing education theory, research and its application in the classroom. Designed for the nurse educator, this comprehensive guide is focused around the National League for Nursing's eight core competencies for academic nurse educators. This textbook contains an overview of the academic nurse educator role, core competencies, strategies for applying theory and research-based knowledge to further professional development. This text is an ideal resource for nurses preparing for the Certified Nurse Educator Exam (CNE) and nursing education students.

Customer Reviews

Although the content of the book is in depth and useful, many of the "figures" and "box" illustrations in the digital version are removed with the caption "Content removed due to copyright restrictions". This decreases the value of learning with this version of the book. I do not remember reading about this issue when I ordered it.

Used for school.

I really enjoyed this book- Utley did a great job. It's easy to read and concepts are clear.

Good price and fast shipping!

So expensive...

I appreciate the quality of this scholarly text that combines NLN standards with nursing research. I look forward to using this in the future.

helpful reference

The book lacks sufficient empirical evidence of academic nurse educators' roles for the past two decades. The book of NLN's sixty-six task statements delineating the scope of core competencies of academic nurse educators without any sound theoretical and or operational definitions could be highly biased without any empirical basis.
