Customer Reviews

I loved this book. I've been wasting my exercise time on cardio and now I know better. The two forms of exercise in this two book combo make so much sense. Check it out at a bargain price for two books. Very highly recommended

Now I'm informed and feel so much better for having found this wonderful two book combo. You're probably doing all the wrong things too so you need this book. Exercise smart and get better results with this exercise tour de force. Cardio is so wrong and so is conventional weight training. If you too

have been disappointed with your past exercise results then you too need to read this combo.

Fabulous

Appreciate the facts about why rebounding is a healthy alternative to jogging and the slow motion exercises have been proven to be effective as well

Rebound to Goodwill.

I am 68 and try to spend an hour a day cycling or hiking. I was looking for something to do indoors during inclement weather and thought I might get a stationary bike. Somehow while doing my internet searches I came upon mini trampolines and discovered this whole world of rebounding. I overcame my sticker shock and bought a Bellicon. I now spend 15 minutes to a few hours, when watching a football game, a day on the rebounder doing everything from the health bounce to jumping jacks and running in place. I can get my heart rate up to the 130s but that can feel much more strenuous than biking where I can get it up to 165 on a good hill. This book validates using the rebounder and the free weight training for seniors. I only use the light weights while on the rebounder so far but I believe the author is on the right track and my next investment might be in those graduated weights.

Open your eyes to an entirely new form of exercise that is virtually free from injury risk and loads of fun! Rebounding is the wave of the now. It's better for your body than cardio and Christopher David Allen explains all the benefits of this wonderful method in his informative book. This is definitely recommended for anyone looking to up the ante on their fitness routine. Allen explains exactly why rebounding works and why it's better for the body than cardio. For example, rebounding on a trampoline causes much less stress on the joints and can be performed by men and women at any age. Download a copy and start off your new routine today!

I really liked this book because the exercises are effective but low impact. You don't have to worry about running around or doing a lot of strain on your joints. The rebound (mini trampoline) part is actually enjoyable! Good exercises that you can fit in to your lifestyle.
