McGraw-Hill's Taxation Of Individuals And Business Entities 2017 Edition, 8e

Synopsis

NOTE: Access Code is NOT INCLUDED McGraw-Hill's Taxation is designed to provide a unique, innovative, and engaging learning experience for students studying taxation. The breadth of the topical coverage, the storyline approach to presenting the material, the emphasis on the tax and nontax consequences of multiple parties involved in transactions, and the integration of financial and tax accounting topics make this book ideal for the modern tax curriculum.

Customer Reviews

Ben Ayers (PhD, University of Texas at Austin, 1996) holds the Earl Davis Chair in Taxation and is the dean of the Terry College of Business at the University of Georgia. He received a PhD from the University of Texas at Austin and an MTA and BS from the University of Alabama. Prior to entering the PhD program at the University of Texas, Ben was a tax manager at KPMG in Tampa, Florida, and a contract manager with Complete Health, Inc., in Birmingham, Alabama. Ben teaches tax planning and research courses in the undergraduate and graduate programs at the University of Georgia. He is the recipient of 11 teaching awards at the school, college, and university levels, including the Richard B. Russell Undergraduate Teaching Award, the highest teaching honor for University of Georgia junior faculty members. His research interests include the effects of taxation on firm structure, mergers and acquisitions, and capital markets and the effects of accounting information on security returns. He has published articles in journals such as the Accounting Review, Journal of Finance, Journal of Accounting and Economics, Contemporary Accounting Research, Review of Accounting Studies, Journal of Law and Economics, Journal of the American

Taxation Association, and National Tax Journal. Ben was the 1997 recipient of the American Accounting Association's Competitive Manuscript Award and the 2003 and 2008 recipient of the American Taxation Association's Outstanding Manuscript Award. Brian Spilker (PhD, University of Texas at Austin, 1993) is the Robert Call/Deloitte Professor in the School of Accountancy at Brigham Young University. He teaches taxation in the graduate and undergraduate programs at Brigham Young University. He received both BS (Summa Cum Laude) and MAcc (tax emphasis) degrees from Brigham Young University before working as a tax consultant for Arthur Young & Co. (now Ernst & Young). After his professional work experience, Brian earned his PhD at the University of Texas at Austin. In 1996, he was selected as one of two nationwide recipients of the Price Waterhouse Fellowship in Tax Award. In 1998, he was a winner of the American Taxation Association and Arthur Andersen Teaching Innovation Award for his work in the classroom; he has also been awarded for his use of technology in the classroom at Brigham Young University. Brian researches issues relating to tax information search and professional tax judgment. His research has been published in journals such as The Accounting Review, Organizational Behavior and Human Decision Processes, Journal of the American Taxation Association, Behavioral Research in Accounting, Journal of Accounting Education, Journal of Corporate Taxation, and Journal of Accountancy.

Terrible. Difficult book to read with barely any examples on how to do problems. Most importantly it doesn't come with connect... Which has the answers to the answer problems. Complete rip off

The textbook is fine, but it looks like it no longer comes with a Connect subscription. Previous versions of this textbook did include it, the professor tells me, and it was unclear from this page whether or not the subscription was included. Changing what's included amounts to an unadvertised \$80+ increase in price and could influence a professor's choice of textbook and a student's choice of what edition to buy or rent. I'm very disappointed with that change and the lack of clarity on this product page. If the publisher (or) either makes this product page clear about what's included and what's not (and indicates if there is still a version that includes the Connect subscription); or provides those who bought this edition with a Connect subscription, I will edit this review to reflect. (Likewise, if I get clarification and it turns out the professor was mistaken, I will change my review. Though, in any case, it should be clarified whether or not the textbook includes a Connect subscription.) The textbook itself is pretty good--reasonably well-written and appropriate for the 21st century. My only complaints so far are around the lack of a Connect subscription and lack

of clarity around whether or not there is a version of this textbook that includes it.

Too expensive. Too many subjects and not enough explanation on each

Apart from being horrendously expensive for a single textbook for a single term..... the book did not even come with connect, which we are expected to spend nearly an extra \$200 for separately? My professor was under the impression that it did come with the connect code since previous versions did, and linked this specific book to our class. I hope no other students made the same mistake I did and waste \$354 on it.

This book is poorly organized, difficult to read, and as another reviewer mentioned, contains factual and grammatical errors. The writing is so terrible that several times I've wondered if I actually have a brain injury that is causing me to read backwards. The writers seemed to make it a personal challenge to present the material in the densest way possible. The Connect materials are almost as bad. LearnSmart often does not ask questions that effectively review the most important material of each chapter. The load times are ridiculously long. It's unusable on a tablet or mobile device. It is one of the more annoying inventions of the modern era. This book should not be used by schools. It shouldn't even be in print.

Recently bought the 2014 version of this book for \$5. Pretty funny how much the newest book cost. But that's just me complaining over textbook cost. The book itself is nothing special. I would expect a book that cost \$200-\$300 to be well written. This book however is pretty bad. Has few examples and when they have those examples they skip over steps without explaining how to do it or how they got the answer. That's the beauty of monopolies I suppose. These big textbook companies print out donkey's butt because what will students do about it?

This textbook is garbage. 1. There are so many factual and grammar errors across the textbook and homework solutions. 2. Most of the material is poorly defined. I hope professors discontinue the use of this book. However, the online MH LearnSmart is very well organized and useful. I enjoyed learning through all of the additional tools and resources that MH has put together. The experience was very helpful, but also very frustrating at the same time.

Garbage. Pure garbage.
