Jim Rohn has been called the most uniquely inspiring business speaker today. A philosopher, motivational counselor and successful trainer, Jim knows how to reveal contemporary success secrets in a way that is both accessible and practical. With a deep understanding of the business world gleaned from years of experience as a salesman, business owner and chairman of the board, Jim ignites enthusiasm and a can-do attitude in all who hear him speak. He is the founder and chairman of Jim Rohn Productions. --This text refers to an out of print or unavailable edition of this title.
I've listened to about every author in the self-improvement game, and for my money, Jim Rohn is the best. I don't know what is so different about him, but I thoroughly enjoy listening to his philosophies on life, happiness, and success. I can't even tell you how many times I've listened to this audio through the years. If I was forced to guess, I would say at least 30. I am a better person because of Jim Rohn... I am thankful for his contribution to society...

This a brief recording of Jim Rohn proselytizing about the value of keeping a daily journal. What he doesn't mention is that keeping a journal at the level he suggests is heavily dependent upon one's personality and cognitive profile... leading to the implicit suggestion that those who don't or can't do what he does won't be successful. I'm disappointed in the length of the recording also... for this price there should have been several hours or recording. No where in the description of the disc is the time mentioned. It is filled with cliches like "living the good life" etc.

Received today and played the first cd already. Good basic advice but everyone once in a while, basic advice is needed to be heard again cause we all get caught up in the complexities of life. Now I will say this though, everything that I've heard so far on this CD can be heard on youtube, but I prefer the CD's so I'm in control of when and how I listen to them.

Let me start out by saying I think is GREAT! Always a pleasure to deal with. I bought this product because a very close friend of mine knowing that I like Jim Rohn's teachings, loaned me the series he'd purchased a couple of years back. I do a significant amount of driving in my profession, and these really help pass the time. However, the series that is offered here is a very abbreviated version of the original series. Containing only two CDs, verses the original six, they've "edited" the bulk of the seminar. The information that they left is quite good, but the information that they have seen fit to delete, is really needed to complete the teaching.

Although Jim Rohn never considered himself a motivational speaker, he managed to outdo them all with "The Art of Exceptional Living." Rohn humbly shares his experiences from unfulfilled early adulthood to a life of happiness and success. The CD set is a fairly short listen overall - less than 3 hours (compare this with Tony Robbins' Personal Power, which runs in the 20 hour range), and Rohn's style makes it an easy listen. One note on this: this CD set is essentially "7 Strategies for Wealth & Happiness" in audiobook form, so unless you want both forms, just get one or the other.
Awesome! This is the 6 disc series that you may have owned back in the day (the other version that’s for sale is abridged). I love Rohn, and this book is a masterpiece. I emailed her a question about the product, and she responded promptly, accurately, and friendly.

I originally had this on cassette. Then the books that the topics came from. Now the CDs. I really enjoyed it and it has helped me. Its a review of common sense habits that can make your life better. If you are organized, it will help you be more organized. If you are well-read, it will inspire you to be even better-read. And if you are overloaded with life, kids, work, and the world, it will help you take a big deep breath, and start to get back on track. I speak at technical conferences and I know what it is like to try to be helpful to hundreds of attendees. In a mixed group, you are not sure what everyone 'wants'. So I have found the best solution is to provide what you know very well and hope the audience finds it helpful. And I think that was what Jim was doing. Talking about real-life issues and giving us some tips and new ways to think about the ordinary. Very, very few books have 'stayed' with me like this one. I have seen reviews saying his material is 'obvious' and 'nothing new'. I disagree. It takes a push to re-think the ordinary and see if our current habits are helping us or hurting us. Yes, keeping a journal to remind us what we did and what we learned is nothing new. But that new habit really helps. Getting a library card and trying to read something 'hard' every month is nothing new, but that habit alone may change a person’s life for the positive, forever. So, I recommend this collection of his work for anyone looking to improve their life in a doable, practical way.

This presentation of Jim Rohn’s "The Art of Exceptional Living" provides valuable insight to what one must do to get the most out of their life.. I enjoyed this thoroughly and have listen to it off and on for over 20 years. This is the fourth copy I have gotten. I keep passing them on to my friends and co-workers. The work is a compilation of presentations in front of an audience as well as some stage recordings to help pull all the elements together. I only wish that I had had the opportunity to hear this live!
