Great

A+ Great book for great price. Thanks for the enriching read.

great book! explained and give tips about how you connect people very quickly.and also how to having a good conversation with others. this book will really helps to the people who are slow sometimes to the person they are talking. sometimes having a slow connection to other people you will be avoided or out of place on the topic this book is highly recommend to others.

Good book, good tips to try. Simple, clear information. I was expecting more examples. Left me with a need for deeper insight.

I really, really liked the principle of connecting by design. Connect Instantly contains many nuggets of gold. It basically states that we are going from place to place just hoping for a spark of connection or chemistry. We want all our friendships to occur "naturally and organically" and while that would be great, that's not how the real world works.The world works because people put in intentional effort and connect by design if they want the social life they imagine. That's the dirty truth we want

to avoid because it's tough and it requires effort, and it requires putting yourself out on a limb occasionally. But, and this reminds me of books on dating I've read, you can't just wait for people to come up to you and openly flirt. You have to take it into your own hands and make it happen, and you are doing everyone a favor. Now that I think about it, that applies to every aspect of life! Haha!

Simple and straight forward. No fluff just plain good advice you can use today. If you quickly need to get better at networking and connecting then I suggest you get this book. Get the audio as well so that you can review using your phone just before you go into an event.

Extremely solid advice and perspective on first impressions and connecting with people, old friends and new strangers. One of the better books I have read on the topic, and I have read A LOT of books on this topic. Why? I'm not socially awkward or weird, at least I think I'm not. Connecting with people is just a skill I believe is extremely important in life so I like to keep brushing up on it, just like any other skill, you gotta use it or lose it. Highly recommended if you like Carnegie, Cain, and the rest of the gang.

I'm autistic. I come across poorly to other humans. I was hoping for much clearer and more specific information in this book i.e. immediately actionable items. Suggestion like the following do not help me: "ask five of your friends to reach into their memory banks and recall their first impression of you in the form of adjectives . . . After you've gotten the list of adjectives, park yourself in front of a mirror and practice the facial expressions, tones of voice, and body language that correspond to these adjectives. For example, if somebody said you were odd and unapproachable, look in the mirror and figure out what kind of facial expressions, mannerisms, tone of voice, and body language are appropriate. The point of this exercise is to be aware of the non-verbal and verbal signals you are sending out. You can fine-tune and avoid the negative signals, and you can practice and emphasize the positive signals. Making a remarkable first impression has never been so easy." OK, 1) I do not have 5 friends and 2) If I knew what expressions went with different adjectives I wouldn't have a problem in the first place. How the hell do I practice not looking "odd"? However other advice was more useful, such as hold eye contact with people only 50% of the time when you are speaking, compared to 80% when you are listening. Also the four phrases of emotional validation are something practical I can put into effect right away. I did get some value from the book, but much of it was filler, and I found it overpriced for the content.
