Donald E. Breyer, P.E., Professor Emeritus, Department of Energy Technology, California State Polytechnic University, Pomona, California. Kelly E. Cobeen, S.E., Associate Principal, Wiss,

Janney, Elstner Associates, Inc., Emeryville, CA. Kenneth J. Fridley, Ph.D., Professor and Head, Department of Civil, Construction, and Environmental Engineering, University of Alabama, Tuscaloosa, Alabama. David G. Pollock, Ph.D., P.E., Professor, Department of Mechanical and Civil Engineering, George Fox University, Newberg, Oregon.

Used it to assist in design of a new roof for a house. So far, was able to take sample problems with solutions for fastener/connection design, create spreadsheets based on them, and verify solutions before plugging in numbers for my application. I expect it to be a valuable reference.

Excellent Book, is a Superb resource of information for those with no experience at all on Wood Structures.

It provides many step by step examples to reference when designing

Good book, too much read though.

Great reference book for wood structures.

I like this book and I rent it for my Timber class. I encourage having it for future reference or for work

Very thorough and understandable.

good book for any level user
