Mark Q. Sutton began his career in anthropology in 1968. While still in high school, he took advantage of the opportunity to participate in archaeological excavations conducted by the local Community College. He went on to earn a BA (1972), an MA (1977), and a Ph.D (1987) in anthropology. He has worked as an archaeologist for the US Air Force, the US Bureau of Land Management, various private consulting firms, and taught at a number of community colleges and universities. He taught at California State University, Bakersfield from 1987 to 2007 where he retired as Emeritus Professor of Anthropology. He now works for Statistical Research, Inc. in San Diego. Dr. Sutton works on understanding hunter-gatherer adaptations to arid environments but has also investigated entomophagy, prehistoric diet and technology, and optimal foraging theory. Dr. Sutton has worked at more than 120 sites in North America and has published over 160 books,

monographs, and papers on archaeology and anthropology.

The book contains some outdated information but all in all it has great information in it especially the highlights which contains archaeological findings that may make you interested in going into archaeology as a major.

As described, and arrived on time.

Got it on time. Perfect. Thanks!

needed for a class

Pretty good book. Helps a lot in class
