"This is an incredibly useful addition to a busy clinician's smartphone or digital device." -Vincent F Carr, DO, MSA, FACC, FACP (Uniformed Services University of the Health Sciences) Doody's™s Score: 92 - 4 Stars!

I like the listed content for this book, however I cannot access sections II-V through the Table of Contents section and many of the tables are too pixelated to read. For example, the algorithm tables are in too small of font to read on my regular Ipad, and when I zoom in, the pixelation gets worse and the words are blurry.

This book is highly valued by many medical students and Licensed Health Care Providers. This is a gift to a friend. This book is a compilation of 5 books in 1. I believe this book will be a really valuable adjunct, not only Physicians, but to NP's, PA's, APN's and much in depth knowledge for Degrees in Nursing at any clinical level. A new 2018 edition is due out in June and for sale on .

I love this book! It is a wealth of knowledge for nurse practitioner students! It is not small with over 1,900 pages! Great resource!

I am always hesitant when it comes to spending money on textbooks but this one was completely worth it.

Love these down and dirty outlines. This book has really helped me in so many ways in school. It helped me in didactic and it's helping me out in clinical rotations. It doesn't have every disease I look up but it has quite a few of them and it has helped me with many assignments. Great resource I use it in conjunction with other resource guides and I use it the most out of all of them.

As expected

Great book. Wish I had known about this in PA school. Large but worth it for the info, lay out and ebook access.

Returned this book. I think the 5-minute clinic is way better. As a FNP student I use that the most. I will likely still use that one in practice too.
