Psychiatric Mental Health Nursing, 3e (Psychiatric Mental Health Nursing (Fortinash))

Synopsis

This outstanding resource provides comprehensive and straightforward coverage of psychiatric nursing. Using a balanced nursing-medical approach, it presents strong baseline coverage of the DSM-IV-TR and related treatments, while continuing to focus on what psychiatric nurses actually do. The book weaves important themes throughout the text after introducing fundamental concepts early on. These areas include legal/ethical issues, research, growth/development, and cultural implications, as well as psychopharmacology, psychobiology, and communication. Takes a holistic approach with a strong emphasis on nursing process and interdisciplinary interventions. Full color design makes the book visually appealing and engaging. Objectives, placed at the beginning of each chapter, emphasize the most important concepts. Key Terms are listed at the beginning of each chapter with page number references, and are highlighted in bold the first time they appear in the chapter narrative. DSM-IV-TR Criteria boxes present the DSM-IV-TR criteria for particular disorders. Nursing Care Plans provide guidelines for care. Each care plan includes a brief case study, followed by assessment, diagnosis, goal setting, interventions with rationales, and evaluation. Clinical Alert boxes emphasize information critical to the safety or well-being of the client. Nursing Care in the Community boxes discuss community perspectives on various disorders and issues. Case studies, with detailed depictions of psychiatric disorders, help students conceptualize the development of effective nursing care strategies, and include critical thinking questions that promote independent investigation. Client and Family Teaching Guidelines boxes highlight the issues families must confront when a member suffers from mental illness. Understanding and Applying Research boxes summarize research studies related to disorders and explain application to nursing interventions. Nursing Assessment Questions boxes present questions that should be included in the assessment of a particular disorder. Clinical Symptoms boxes summarize the symptoms that indicate a certain disorder. Collaborative Diagnoses boxes present DSM-IV-TR and NANDA diagnoses relevant for a certain disorder. Additional Treatment Modalities boxes summarize various modalities and interventions that are used in conjunction with nursing interventions in the treatment of a particular disorder. A bulleted Chapter Summary concludes each chapter, summarizing the most significant ideas to remember. A glossary at the end of the book provides concise definitions of key terms presented in the text. Includes a separate chapter on Psychobiology that covers basic neuroanatomy, as well as the psychobiological aspects of psychiatric disorders. A separate chapter on Complementary and Alternative Therapies describes current therapies used in the treatment of physiological and psychological health problems, and demonstrates the importance of providing holistic nursing

care. Completely updated content throughout, including the DSM-IV-TR taxonomy and 2003-2004 NANDA nursing diagnoses. Cultural Issues and Spirituality chapters combined to form Chapter 5: Cultural and Spiritual Issues. Three developmental chapters (Children and Adolescents, The Adult, and The Elderly) combined to form Chapter 8: Growth and Development Across the Lifespan. Therapies content combined to form Chapter 19: Interactive, Activity, and Electroconvulsive Therapies. Chapter 4: Legal and Ethical Implications in Clinical Practice thoroughly revised with a more clinically relevant focus. Chapter 20: Psychopharmacology thoroughly revised to include up-to-date research and the newest drugs available for treatment of psychiatric disorders. Includes multiple-choice review questions at the end of each chapter for immediate reinforcement of chapter content. Answers are provided in Appendix D. Rationales for all critical thinking questions that end case studies are available on the book's Evolve website. Content on family therapy has been increased throughout (e.g. Substance-Related Disorders and Eating Disorders chapters) in response to reviewer comments. New content on "designer" or "club" drugs added to Chapter 13: Substance-Related Disorders. Drug monographs, available on the Evolve website, provide information on the most commonly prescribed psychiatric medications.

Customer Reviews

Katherine M. Fortinash, MSN, RNCS, CNS, Certified Clinical Specialist, Adult Psychiatric-Mental Health Nursing; Associate Faculty, Mt. San Jacinto College, Menifee, CA; Clinical Nurse Specialist

and Educator, Sharp HealthCare, Mesa Vista Hospital, San Diego, CA; and Patricia A. Holoday Worret, MSN, RNCS, CNS, Certified Clinical Specialist, Adult Psychiatric Mental Health Nursing; Professor, Psychiatric Mental Health Nursing, Palomar College, San Marcos, CA; Consultant, San Diego, CA

As a professional psychiatric mental health nurse, it is essential to stay on top of changes in the profession as well as finally much clearer and more interesting interpretations of the historical research our professional ancestors gave to us! If you are interested in this and writing chapters in the future, this is a good place to start. We need a chapter on Disaster Mental Health for nurses, a new and burgeoning field much needed.

Great basic review/overview. Used this text to study for my PMHN-BC. Also use it as a resource as an ADN nurse instructor. Love the format - a relevant but basic overview of each topic. Not a comprehensive or advanced text - but a great overview / starter text. Clean clear language, direct, topical, and useful. LOVE the inclusion of Peplau

This text isn't my favorite because it takes all similar disorders and put interventions all together. It's difficult a little to know what intervention applies to what. I like my information organized in a particular way. Instead I used the Saunders nclex review book, which has a psych section, and I understand the information so much better! It breaks it down by each disorder to the interventions for that disorder. This book was ok, but not organized in the best way that I would like it to be.

This is one of the worst books I've ordered. To state it might have some writing in it was an understatement. There is writing ALL over the book. Every page, every box, etc. I paid way too much for what I received.

The book came earlier than expected. Very much appreciated!

Good content on psych nursing, it was a helpful at my psych clinicals and also at my first job as a psych nurse!

Fast Delivery and wear n tear as expected.. Not bad for used book, thanks

In great shape
