# Expedient Homemade Firearms: The 9mm Submachine Gun

## Synopsis

The author provides clear, step-by-step instructions for an expedient 9mm submachine gun. It is easily constructed from readily available materials, primarily steel tubing; it does not require a lathe and milling machine and it can be built by just about anyone in about a week. For Academic Study Only

Shipping Weight: 9.6 ounces (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 71 customer reviews

Best Sellers Rank: #94,164 in Books (See Top 100 in Books) #5 in Books > Crafts, Hobbies & Home > Crafts & Hobbies > Weaponsmithing #12 in Books > Crafts, Hobbies & Home > Antiques & Collectibles > Firearms & Weapons > Firearms #46 in Books > History > Military > Weapons & Warfare > Conventional

## Customer Reviews

Very good. More information on quality would be appreciated.

Also academically interesting. This is a glimpse into how firearms work.

A clever and great book on how to put together a gun when having a gun at times feel necessary.

This firearm is pretty complicated. I'd say beyond the ability of most to construct. I have built a single shot 12 gauge from another book. Also the materials are listed in metric and are not readily available in the U.S.

very interesting surprising

All good

great reference

Pretty cool book. I enjoy building things. Not sure if I will get around to this build. However, As long as you can think through the process logically, all the info is there.
