Waterfowl Of North America: A Comprehensive Guide To All Species

Synopsis

"Waterfowl of North America contains 185 color photos of all the breeding and commonly occurring waterfowl species found in North America. Species accounts show perched, swimming and flight photos, with males and females illustrated where applicable. Immature birds are shown for some species as well. Some similar species are shown side by side to allow for easier ID comparison. Each featured species includes a short description of their physical features, body and wingspan measurements, and preferred habitats. The status of each species, including seasonal frequency, resident or migrant occurrence, and breeding location and habitats are also noted. These guides differ from other similar products by the increased number of photos for each species, which allows readers to compare a variety of individuals. This laminated, waterproof, folding field guide is a must for anyone who wants to identify waterfowl anywhere in North America and they fit in your back pocket when you complete your ID conclusion. You've tried the rest; now try the best quick reference guides for North American waterfowl."

Customer Reviews

Ok but not great, have taken them with me in the field, fits in pocket nicely but does not cover all the shorebirds here in California and the pictures do not represent the color of the birds that well.

This thing is great it is laminated so you can bring it with you hunting.

useful

Very user friendly and easy to take wherever you go.

Very helpful and informative for this newby duck hunter

This is an awesome laminated compact guide

Love these series of pamphlets and purchased the Hummingbirds & Waterfowl of North Am, and Raptors of Western NA. Saw them in the store at one of the national parks we were at this past winter and ended up purchasing some on when we returned home. They are laminated, great color and excellent info for a quick reference in the field. Easy to take with you as it is not bulky and folds out.

Great reference. Exactly what I wanted.
