Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

When I see a butterfly, I always wonder, what kind is it?This pamphlet gives you the butterfly

species, and what type of habitat it may be found in Pennsylvania. The pamphlet is also laminated to make it more durable when carried in the field. The caterpillar and pupae stages are also included. This is a wonderful pamphlet to educate children about butterflies and moths. I highly recommend it for the casual butterfly watcher.

I love these guides, I think I have them all. Common name, latin name, when and where you'll find them

After planting a butterfly garden in my yard, here is Pennsylvania, the reference book I had was for butterflies all over the world. However, I needed to limit my search to identify a new butterfly in my new garden to those from my area. This guide is perfect. It is a quick easy reference for those butterflies native to Pennsylvania. Thank you.

Nice tool for in the field.

Twelve pages may be sufficient for Pennsylvania butterflies... there aren't that many of them. This guide is a bit too abbreviated though; it does not tell how common a species is, nor does it have a map, not even a little one, showing the range of the species in PA.

GREAT, LOVED IT!!!!!!

I live butterfly's and found the leaflet very interesting would recommend it to anyone that love's butterfly's. great and in joy

Nice but missing most of what I look up
