Average Customer Review: 4.7 out of 5 stars 79 customer reviews

Best Sellers Rank: #344,357 in Books (See Top 100 in Books) #235 in Books > Christian Books & Bibles > Ministry & Evangelism > Sermons #246 in Books > Religion & Spirituality > Worship & Devotion > Sermons

## Customer Reviews

Neville Goddard is well known as one of the most influential teachers and writers of metaphysical work. Neville was born on 19 February 1905 in Barbados. He was the fourth child in a family of nine boys and one girl. In 1922, Neville came to the United States to study drama at the age of seventeen. During his entertaining tour in England as a vaudeville dancer and stage actor, he developed a great interest in metaphysics. Hence, he gave up his entertainment job and devote fully to the study of metaphysics and spiritual matters. --This text refers to an alternate Paperback edition.

I too agree that "Awakened Imagination" by Neville Goddard is a great book. As a matter of fact, I even gave a different version of this book as a college graduation gift to one of my friends that recently completed her bachelor's degree (she has the green Devorss Company Publications version that is 94 pages). She told me that she liked the book very much because the information given on using your imagination gave her some good insights. The following is some of the very interesting and helpful information contained in this guide:1) The following informational gems are both on page 30: All happiness depends on the active voluntary use of imagination to construct and inwardly affirm that we are what we want to be. We match ourself to our ideals by constantly remembering our aim and identifying ourselves with it.2) This other passage on page 35 also

personally resonated with me: If we assemble the right sequence and experience it in imagination until it has the tone of reality, then we consciously create circumstances. This inner procession is the activity of imagination that must be consciously directed. There are many more great passages listed in "Awakened Imagination". I had a strong feeling to share a glimpse of what is available so that everyone reading this can have a basic foundation of what to expect. The happiness passage from page 30 helped me to really start to realize what it takes to experience true happiness. Neville Goddard's writings are very powerful and insightful, and would be beneficial for anyone who is open-minded to reading his books. I would say to definitely check out "Awakened Imagination" and/or any of Neville Goddard's other books if you are aware of how imagination can affect reality, and you intend to do something about it.

Neville writes: "Man becomes what he imagines." Whenever we feel misunderstood, neglected, victimized, afraid, we misuse our imagination. Our habitual inner conversations fashion tomorrow's circumstances. Imagination is the force by which outer reality is brought to pass. Neville believes that "We were subjected to this biological experience because no one can know of imagination who has not been subjected to the vanities and limitations of the flesh, who has not taken his share of Sonship and gone prodigal, who has not experimented and tasted this cup of experience; and confusion will continue until man awakes and a fundamentally imaginative view of life has been reestablished and acknowledged as basic." The reason I read Neville's books and other books of the kind is to be reminded again and again of the importance of right thinking. "Whatever is true, whatever is noble, whatever is right, whatever is pure, whatever is lovely, whatever is admirable--if anything is excellent or praiseworthy--think about such things."

Excellent. Neville speaks 100% from the heart. He was never about selling books or marketing old ideas in new packaging. If you really want to understand your power and ability to create your life the way you want to, read Neville and return to him often. His books are relatively "thin" because he just got right to the point, no fillers and fluff. I believe he channels his teachings.

This is one of many books that help the spiritual seeker learn how to manifest things in their lives. It's true that the imagination is the portal and emotions must be "wrapped around" the imagined thing desired. I've begun to find myself having good experiences with this method and I recommend this book to begin to learn this skill. Of course it takes practice. Remember there are no coincidences. Anything that manifests after you've placed your "order" is the real deal. Be grateful

every time you make progress. In fact, be grateful everyday success or not. It helps.

If you love Neville, you must order this book. The simple message is to imagine yourself into the state of your fulfilled desire, especially right as you are falling asleep. I also particularly liked how he explained observing your inner talk in order to align it with your desires. However, this book is so masterful that I do it a disservice by trying to explain it. If they are short on copies, it is probably because I just bought them all to give to friends!

This book is fantastic and transports the reader to a new way of thinking. I do find that I need to be in a quiet place when reading Neville's books as I tend to analyze each passage to better understand and feel the message he is sharing with the reader. If you're questioning why things happen in life then I would highly recommend this book.

Neville Goddard has got the formula as confirmed biologically by Bruce Lipton. Neville goes way further than The Secret and finds that place that Esther & Jerry Hicks just missed. Powerful essential reading

This was my second Neville Goddard book. Both have been eye-opening and thought provoking. Awakened Imagination was short and to the point. It's a quick read to expose you to the positive side of imagination and how to use it. I am a believer in the power of positive thinking and this serves a guide and reminder. This is a good book to revisit on occasion to keep yourself on track and open-minded to the limitless possibilities of our creator in us.
