The Anatomy Student's Self-Test Coloring Book

Synopsis

Learning and naming the many parts and systems of the human body can be a daunting task for student nurses, as well as for other students preparing for careers in the various scientific and medical professions. This highly original book helps make learning a great deal easier. Hundreds of anatomically accurate line illustrations show human body parts and readers are encouraged to shade them in with colored pencils. It's a simple physical task intended to imprint on students' memories the shape and location of each body part, making later visualization and memory retention much easier. The book has a spiral binding hidden beneath the cover's spine so that pages lie flat for easy coloring. Other features include:

- Tabbed chapter openers for quick reference
- Extra-heavy paper that minimizes show-through
- Every body system and part is presented
- All parts labeled with correct anatomical names
- An extra feature is a set of eight transparent overlays illustrating the human body. They simulate the peeling away of layers of tissue to reveal anatomical features, such as muscles, bones, organs, and circulatory system. The overlays are bound into the book with scissor-perforated lines that show students where to cut.

The Anatomy Student's Self-Test Coloring Book is a must-have learning tool for all students and practitioners who require detailed anatomical knowledge. In addition to a substantial and instructive text, it features 144 two-color pages and 32 additional pages in full color.

Book Information

Spiral-bound: 176 pages

Publisher: Barron's Educational Series; Edition Unstated edition (October 1, 2007)

Language: English

ISBN-10: 0764137778

ISBN-13: 978-0764137778

Customer Reviews

(back cover) A hands-on learning tool for students and medical practitioners More than 350 clear

and detailed anatomical illustrations Labels left blank to test your knowledge as your color Answer keys located at the bottom of each page Spiral binding allows the pages to lie flat 8 acetate overlays feature full-color body system illustrations

The Anatomy Student's Self-test Coloring Book contains more than 350 digitally-created line drawings, which give you sharp and realistic views of anatomical structures, accompanied by easy-to-follow text. The physical task of coloring in the illustrations imprints on your mind the shape and location of each body part, making later visualization of the parts much easier. Labels are left blank so you can test your knowledge of the names of the body parts and systems with the answers given at the bottom of each page. Use the colored acetate overlay sheets of body systems to correlate the relationships between the different systems. This is a must-have book for the vast numbers of students and practitioners requiring detailed anatomical knowledge. **The Anatomy Student's Self-test Coloring Book** gives you a clear and concise understanding of human anatomy.

(front flap) Detailed line drawings of body systems and body parts make this book an invaluable hands-on learning tool for students. More than 350 illustrations, complemented by informative text, illustrate the range of human anatomy, organized into the following chapters. Overview of the Human Body Cells and Tissues Integumentary System Skeletal System Articulations Muscular System Nervous System Special Sense Organs Lymphatic System Circulatory System Respiratory System Digestive System Urinary System Endocrine System Reproductive System Human Development

Full-color acetate overlays of body systems: Skeletal System Muscular System Nervous System Lymphatic System Major Veins Major Arteries Respiratory System Digestive System

(back flap) **CHIEF CONSULTANT** Kurt H. Albertine, Ph.D., is Professor of Pediatrics, Medicine, and Neurobiology and Anatomy in the Department of Pediatrics at the University of Utah, School of Medicine in Salt Lake City, Utah. Dr. Albertine received a bachelor's degree in biology from Lawrence University, Appleton, Wisconsin, and a doctoral degree in human anatomy from Loyola University of Chicago, Stritch School of Medicine. He received post-doctoral training at the University of California, San Francisco, Cardiovascular Research Institute. Dr. Albertine has taught human gross anatomy for more than 30 years and is the Editor-in-Chief of *The Anatomical Record*.

Also from Barron's **BARRON'S ANATOMY FLASH CARDS** An invaluable study and revision aid, Barron's Anatomy Flash Cards are arranged by body system, with each card illustrating a particular component in the system. The front face features the titled illustration with numbered pointers. On the reverse, each numbered part is matched with its correct name, followed by a concise description of the body part. 264 full-color cards Anatomically correct color illustrations Description on reverse side of each card Cards color-coded by anatomical systems Plus 11 7/8" x 15 3/4" human body poster --This text refers to

an out of print or unavailable edition of this title.

This is a nice book! As a nursing student, I am always on the lookout for something to make studying more fun and I think this might be just the thing! I like that it is spiral bound. This will make it very easy to use. It had really cool transparent pages with overlays of the different systems of the body which is a neat feature I didn't expect. I fully recommend this book!! review items in hopes that my review will help you to make an informed decision on your purchase as I also rely heavily on customer reviews when making a purchase on . If this has helped you in any way, please take a moment to click the "helpful" button and let me know. Thanks so much! Have a great day and happy shopping!

This book is awesome! It's actually more detailed than what is required for me from my college anatomy class. It even has images including structures at the tissue and cell level which is really helpful for prepping for histology labs. Answers are upside down at the bottom of the page so it's great for quizzing yourself as you go before you label. My professor thinks it's great as well and for the price it definitely can not be beat as anatomy study tool!

Great quality book. I got it for a general A&P class and the charts seem to match well for my assignments. Not sure it would be as helpful for an advanced class.

Bought for niece who is in a nursing program, she loves it! Very helpful!

I adore this book. I just wish it provided color coding like my old book.

Not as detailed as I would like on each system, but a great overall study book.

Great if u have the time to color it all and study. But A/P is so fast paced, I didnt have time to fill in blanks and do.

So, I almost bought the more expensive \$50 version of an A&P coloring book but cringed at how much it was. I mean, what student can afford to throw money away on a ton of different study aides. So, after reading the reviews on this coloring book which was so much less than the others, I took a chance. Boy, am I glad I did, it's awesome and has helped me a HUGE amount, driving in the areas and anatomy which I'm doing in class. Awesome study aid!!!
