I have been using this for about a month. I am an student bass player and have been learning for about 5 years. This book and CD are very helpful. I started w/ the first tune, "Children of the Grave" and was surprised to see that it is recorded on the CD in both standard tuning and drop tuning (3 steps down). This is handy if you don't want to retune just for that song. The book has both standard bass clef notation AND bass tab. The songs are complete, note for note. A great tool for learning Geezers style playing, which is often very fast and busy. The only improvement would be a spiral bound book, as most of the tunes cover several pages and flipping pages is a bit tricky.

Very close to the original tracks just listen to the Cd for timing.
