Even the most madcap of these inventions will engage readers and leave them wondering, 'Why didn't someone think of that sooner?' • Browsers who love weird stuff will be tickled by the contents of this book. We love this book! So many innovative gadgets, so many smart people with the stamina to create their vision. I love how creative people are, and how useful and cool most of these gadgets are! Our whole family loved looking through this book. We left it on our coffee table, and every time someone came to our house to visit, we showed it to them, they were all amazed and delighted to look through it. A great conversation starter!

I am a teacher and we did a unit about inventing and my kids loved this book!
