This is *not* adapted for Kindle. Wish I would have read the reviews before purchasing. The maps are completely illegible on an iPad Pro. Going to write for a refund.

This is a very useful of compendium of historic maps. I would like to see more maps and the same maps with greater detail, but I am grateful that somebody found these maps and collected them into a single source book.

This will be a useful reference as I try to trace the steps of my ancestors. However, I will need to use my magnifying glass to read the maps.

Thank you

Interesting to see the changes over time to countries especially the Eastern European countries where my wifes family came from.

Excellent book!

Its not made for kindle at all and you cannot even read the names of the towns on the maps - I would like a refund as its impossible to read any map

Excellent Maps however, I was expecting more information on certain dated maps. Was looking more for genealogical type maps, however, was informative and interesting.
