Law & Ethics For The Health Professions

Synopsis

Law and Ethics for the Health Care Professions illustrates the numerous legal and ethical issues that health care professionals face every day. The topics are derived from real-life experiences and dilemmas from a variety of health care practitioners. Through the use of Learning Outcomes, Key Terms, Ethics Issues, Chapter Reviews, Case Studies, Internet Activities, Court Cases, and Video Vignettes, students hear from health care practitioners in various locations throughout the United States as they encounter legal and ethical problems and situations. Students will practice critical thinking skills to decide how to resolve the real-life situations or theoretical scenarios, determine why the court made a particular ruling and decide how the issues are relevant to the health care profession they will practice.

Carlene Harrison, EdD, CMA (AAMA) Carlene Harrison is Dean of the School of Allied Health at Hodges University and is also Program Director for the Master of Health Services Administration and Graduate Certificate in Health Informatics. She has been a member of the faculty at Hodges University since 1992, but came on board full time in 2000, serving first as Chair of the Medical Assisting Program. As Dean of the School of Allied Health, she has overall responsibility for the following degree programs: Health Services Administration, Biomedical Sciences, Medical Assisting, Health Information Management, and Physical Therapist Assistant. Her doctorate is from Argosy University. Her dissertation research looked at improvement in critical thinking in adult learners. Before becoming a full-time educator, Dr. Harrison worked for over 20 years in the

healthcare field as an administrator. Employed mostly in the outpatient setting, she has worked in the for-profit, not-for-profit, and public health sectors. Karen Judson, BS Karen Judson taught biology laboratories at Black Hills University in Spearfish, South Dakota; high school sciences in Idaho; and grades one and three in Washington state. She is also a former laboratory and X-ray technician and completed two years of nurse's training while completing a degree in biology. Judson has worked as a science writer since 1983. She has written relationship, family, and psychology articles for a variety of magazines, including a series of high school classroom magazines, making a total of 500 articles published. Judson writes science and relationship books for teenagers (Enslow and Marshall Cavendish publishers). Her book for teens, *Sports & Money: It's a Sell Out*, made the New York City Public Library's list of best books for teens in 1995. Her book for teens, *Genetic Engineering*, was chosen by the National Science Teachers Association as one of the best science books for children in 2001 and was featured on the NSTA Web site.

I bought the text book assuming that the online access code would be included with it. Now, in order to comply with my class requirements, I have to pay an ADDITIONAL \$55 IN ORDER TO HAVE ONLINE ACCESS. It would be very informative if this could be included in the description as to whether or not it included the ONLINE ACCESS CODE.. Not a very happy consumer right now.

I used this book for school and it was very interesting. A lot I didn't know about or heard about before opened my mind a little more knowledge wise.

Great Book!

The review questions don't have answer, which is not good for self learning

The book came very quickly and was pristine. It was a really good deal to rent this book as we only needed it for a mini-mester.

This book would cost me more anywhere else that I've searched. I could not rent this book cheaper than I bought it for.

Have to have it for school. Lots of info easy to understand. Lots of study cases help to understand

the law.

having this book in hand got me an A+. I highly recommend this book!
