Customer Reviews

• A bright, appealing first book of general information for young children on everything from how our bodies work, to the world of nature and commerce around us, to the solar system...This is a book that would work well in a home, classroom, or school library to pique children's interest in a variety of topics. • Children's Literature

Kingfisher is an award-winning publisher of non-fiction and fiction for children of all ages. Known around the world for its informative and engaging reference and early learning books, Kingfisher also receives widespread acclaim for its classic anthologies for five- to fourteen-year-olds and original picture books for very young children.

This is a great book - my 7-year-old daughter totally loves it! She chooses topics that she wants to read and it's very interesting for me to observe her evolving interests and "research" preferences :) It's great that she can read it by herself and understand almost everything. The book is written in a very easy language, perfect for younger kids. With a lot of detailed colorful pictures and a wide range of topics (from plants to planets), this book also makes a great present! In fact, my daughter fell in love with this book when we bought it as a present for her friend's birthday. So, I had to buy a copy for my daughter, too :) Her friend said that this book was the best present she received (and she got A LOT OF presents!).
