Contract Law: An Index And Digest Of Published Writings

Synopsis

This is a new type of book. It provides an index of the most useful and important academic and other writings on contract law, whether published in articles or journal chapters, or as books. These writings, with their full citation, are gathered under familiar contract law subject-headings, and the most significant half of them are digested in a summary of a few lines each. The book aims to cover all writings published in the English language about the Common Law of contracts, and includes sections on contract theory and the history of contract law, as well as sections for the more traditional substantive topics (such as the interpretation of contracts, penalty clauses, remoteness of damage and anticipatory breach). This work should prove an invaluable resource for practitioners, academics and students, increasing awareness of important writings, and saving readers time by familiarising them with the work that has already been done in their particular fields.
