State Organs: Transplant Abuse In China

Synopsis

China's organ transplant numbers are second only to the United States. Unlike any other country, virtually all Chinese organs for transplants come from prisoners. Many of these are prisoners of conscience. The killing of prisoners for their organs is a plain breach of the most basic medical ethics. *State Organs* explores the involvement of Chinese state institutions in this abuse. The book brings together authors from four continents who share their views and insights on the ways to combat these violations. *State Organs* aims to inform the reader and hopes to influence change in China to end the abuse.

Book Information

Paperback: 144 pages

Customer Reviews

David Matas is an international human rights lawyer based in Winnipeg, Manitoba, Canada. He is the co-author, with David Kilgour, of *Bloody Harvest: The killing of Falun Gong for their organs*, published by Seraphim Editions in 2009. For their efforts in combating Chinese organ transplant abuse, the two Davids were nominated for the Nobel Peace Prize in 2010. Dr. Torsten Trey is founding member and Executive Director of Doctors Against Forced Organ Harvesting (DAFOH). After learning about the systematic harvesting of organs from living prisoners of conscience against their will, he decided to shift his focus from patient care to this non-profit organization.

This book gave me what I feel is a balanced and professional insight into an issue of a new form of murder that is most probably being carried out in China today. It reminds me of the saying "Never

again" that was heard after the Nazi Holocaust in the last century. Sadly to day the world is hearing "Once again!" because of live organ harvesting of prisoners and prisoners of conscience.

I am hoping everyone will read this book. It is appalling what is happening in the "People's" Republic of China. The PRC admits to using executed prisoners for 90% of organ "donations". The rest of the world is left to believe that these executed prisoners are guilty of a recognizably capital offense, and have received a fair trial with adequate legal defense in a legitimate legal setting, and have given consent. This is not the case. Why so few are investigating this situation, like governments and media, is very interesting. And the complicity and cooperation among pharmaceutical companies, medical schools and scholarly journals is also very interesting.

I had already read through the book before I purchased it. My friend recommended it to me and I read it within few days. I was deeply shocked and felt hard to believe the crime happening in China now in the modern society. I decided to buy one for myself for further reading and collection. I hope everyone can read this book! HIGHLY RECOMMENDED!

Human life is the most precious. This book exposes the greatest tragedy of our time - complete disregard of human life value. Gangsters took over a nation and brutally persecute tens of thousands of innocent people in the most evil and inhumane way that ever existed in history - forced live organ harvesting. I will recommend and I hope that every person around the world read this book and try to understand the facts and the messages it carries.

Touch people's heart, I read it with tears running down my face,,,

This book is a collection of many experts' writing on the issue of forced organ harvesting from Falun Gong practitioners and other prisoners of conscience in China. This is simply the greatest evil on earth today and must be stopped. I thank the authors for exposing this evil to the world.

Highly recommended as the authors of this book were risking their life to reveal crime against humanity by the Chinese Communist Regime that has never happened on this planet.

We are appalled by the painful extraction of organs from living prisoners-of-consciousness; there is no freedom in China when high government officials both authorize killing innocent people practicing

meditation (Falun Gong is not a religion) and profit from murder. International condemnation is morally mandated.
