Synopsis

The Middle School iScience series offers opportunities for deep study in each strand of science. Students get the same rich content as the integrated series, but organized for more concentrated study at each grade level. iScience meets students where they are through engaging graphic novel-style features and thought-provoking questions that encourage them to relate the science concepts to the world around them. The inquiry-based 5E lesson cycle provides active, hands-on explorations of the concepts. Life iScience is part of a three-book series along with Earth iScience and Physical iScience. Earth iScience provides students with accurate and comprehensive coverage of Earth and space science. The strong content coverage integrates a wide range of hands-on experiences, critical thinking opportunities, and real-world applications. Includes: Print Life iScience Print Student Edition
