Customer Reviews

I enjoy this book ! Health care professionals should learn, respect, other cultures and beliefs all people should respect other beliefs. Know about how people who involved in people health care and environment social workers sometimes don't respect people who are forced to participate in government aide. No human should be turned down. It is really sad how some professional treat people who are in need. But if they are put in that same situation they have got on welfare and stayed on their until they got ready to get off. TB

good book

Interesting and complex subject matter organized in an easy to follow progressive format. The book came in excellent condition, very quickly.

Definitely a must have for anyone in healthcare with an interest in spirituality/religion or for educational purposes. Book came exactly as described and shipping was fast.

It is going well with my class.

This was a school book that was required for a class that I was taking. The book came in time for the class and was in great condition.

I bought this book as a required textbook for my nursing classes earning my masters degree in nursing, It is a great educational tool but not something for me for personal use.

This book will be used as a required text for a course on Spirituality and Health. We won't use the entire book, as we have several other resources as required readings, but the general overview nature of the book makes it very useful for the course.
