This collection of 28 essays is an abundant and diverse exploration of feminist art history from the Renaissance to the present. Deft, intuitive writers equipped with the intellectual equivalent of a surgeon’s scalpel cut into the established canon to expose how sexual bias has distorted Western art history. In the introductory text, the editors warn that the “postmodern position that no qualitative standards in art are legitimate” can be construed as a device to exclude those who are not white male artists from an “expanding and changing canon.” Essays like Patricia Simons’s “Women in Frames” methodically reveal depictions of the female body as subservient to the (male) viewer’s gaze, the function of which is control and supervision. As a whole, this book is a thoughtful, stimulating collection that addresses the mechanism inherent in art that works to block women’s emotional, social, and political self-realization. Highly recommended.- Marigrace Maselli, New York

I love this book - it’s a great discourse of female art history. I bought the book used for a great price and it was like new.

This is a really important book for any female artist, art historian, or scholar. If you’ve had any kind of formal aramid training in art history, this book is a must-have enlightening addition to your education; the perspective and information provided was like a constant mind blowing epiphany. If you have no formal training, this is great place to start. It’s compelling and very important historical information.
