## Customer Reviews

Mark Edmundson is a furniture maker and teacher in Sandpoint, Idaho. He has written articles on pocket hole joinery and other topics for both Fine Homebuilding and Fine Woodworking magazines.

I wanted to see a book with examples of furniture using 100% pocket holes or as close to it as possible, some of the furniture plans use biscuit and dowel joinery with pocket holes. It's not wrong to use the forms of joinery but I wanted to learn tricks and tips by limiting your self to just pocket holes joinery. Instead of the biscuits and dowels, I would see projects that use the table saw (circular) , maybe a router, and pocket hole for every project. This book requires you to buy 2 new tools, a biscuit joiner and dowel jig to complete the projects.

This is a great introduction to pocket hole joinery. I especially liked that the author spoke about the downsides to this type of joinery (which are mostly avoidable). The book includes some nice projects which highlight the types of things that can be done with pocket holes.

Great book to start with my kreg. Looking ot make a cabinet with is soon

Great book for using your pocket hole jig, and building 10 or so different furniture around the house.

Great book which effectively introduces the reader to pocket hole joinery via some nice projects. Clear writing with plenty of good photographs.

Big help in getting best results with Kreg system. Worth the price!

Has some great ideas. Not always clear in explaining the execution of those ideas, but good overall.

My son really likes working with the pocket jig so when I got him this book he was pretty excited. It has a lot of great projects.
