# Allen And Mikes Really Cool Backpackin' Book

## Customer Reviews

Lots of useful suggestions in the book about all the items a person needs to start backpacking. He covers all of the necessities a person needs from the sleeping to the food and everything in between. As with any sport things change and new items come along after a book is printed and I think this is the reason he did not manage to discuss a few things. The few things that were not discussed, Camping in a Hammock, The use of an alcohol stove to save a lot of weight and even the wood burning camping stove to save the fuel weight since you gather the wood as you walk along. Two other books to read with this one are Lighten Up by Don Ladigin would be a useful book along with the Ultimate Hang by Derek Hansen ( Hammock Camping ) Using the information from those books a person could set up a good backpack at the start.

I am more of a car camper. I have no real liking for ultra backpacking taking only the necessary. I bought this book more for the list of gear but it wasn't very good for that.

I enjoy the quality of the books as well as the artwork.

This book is packed full of useful information and well placed humor. You may not agree with everything, but you are bound to find something useful in this book. Easy to read and use. Super addition to my backpack and hiking books.

If you're a backpacking god then this is not the book for you however, if you're either new or moderately experienced there is a lot of good information in this book. It's presented in a style that is easy to read and easy to comprehend. The illustrations add to, versus simply portray the textual information which I liked a great deal. Good information on low impact camping, gear selection, techniques for packing, cooking, walking, even how best to get you pack on and off. Would definitely recommend to all but the most experienced of campers.

If you buy one backpacking book this should be it. Discusses everything from organizing groups how much food to bring what should you bring. Easy ways to cook bake in the woods with simple recipes.. Basic hygiene for men and women. Where should I make camp and a lot of cool tips and tricks. Funny and informative style.

This is a very entertaining book, due to humor and covering the outdoor basics. The author does a

good job of explaining items to pack and their value to backpacking. Great illustrations by Mike Clelland, (comical and gets the point across). It is an easy read and has useful things to go back and check again. The only draw back to this book is some of the illustrations are hard to see on my Kindle. I used the zoom feature and made it thru. Overall a good book!

Best book ever. Fun and entertaining. I take it camping! It's useful and has a lot of useful tips. Get it and you will know what I'm talking about. If you love backpacking, you will enjoy this book.
