Customer Reviews

My son used this same book over two academic years. Unfortunately it got misplaced somewhere in between and we had to scramble to find a replacement. It's very expensive to buy new. It looks like now there is a new edition, but he needed this exact edition so he would have the same book as the rest of his class. We ordered from betterworldbooks and are happy with the book. HOWEVER I do NOT recommend their so-called "expedited" shipping for which I paid extra. When the book finally arrived, it came PRSRT BPM which is a slow postal rate similar to Media Mail/Book Rate. Now granted, maybe it would have taken even longer via regular shipping, but when I pay to upgrade

shipping, I expect Priority Mail, fedex 2-day, or some similar ACTUAL faster shipping class. With "expedited" shipping the book arrived on the 6th business day which was the 10th calendar day. When I placed the order it said expedited shipping would be 2 to 6 business days but my confirmation email said 3 to 8 business days, so the package could have come even later and still fallen within the guidelines. I contacted BWB twice and they think their "expedited" shipping is just fine while I think it's a misrepresentation. So I may order from them again, because they have a large selection of reasonably priced used books, but I would never pay for so-called upgraded shipping. Also the package was not trackable till a full week after ordering even though it showed it as shipped (it came via a hybrid shipping partnership and part of it was not visible to me till after I contacted betterworldbooks wondering where the book was). I would have been happy to pay for an even higher shipping upgrade if it had been offered (something with a guaranteed day of delivery).

Very detailed book! Worth Buying!

This is not a good textbook for beginning Spanish language learners. Too much minutiae in the text make reading it (in English or in Spanish) a chore. Also, there are whole pages in lesson ONE completely in Spanish, and then questions about what was presented (also in Spanish). This is a book for beginning students. How in the world are they supposed to read and answer questions in Spanish in lesson one? There have got to be more engaging Spanish textbooks. They use this book in my school district, so you know no thought went into picking it!

Great book!

Item as described.

No problems. Great condition.

Was a little beat up but it was all good

My son used this book for his Spanish class in seventh and eighth grades. We bought it for use at home. It is very good.
