Sean Bennett is a former program coordinator for the Truck and Diesel Department at Centennial College, as well as a former corporate trainer for Mack Trucks. During a 20-year tenure at the college he authored new curricula, helped overhaul existing course offerings, and chaired a wide range of curriculum development committees for the Province of Ontario. Mr. Bennett has written more than 30 books dealing with diesel, truck, heavy equipment, and automotive technology and currently devotes his career to technical writing and speaking engagements. He is an active member of the American Trucking Association's Technology and Maintenance Council, the

Association of Diesel Specialists, the Society of Automotive Engineers, and the North American Council of Automotive Teachers. He is widely regarded as the foremost author in medium- and heavy-duty truck technology.

This book like all the Sean Bennett books is very poorly written. The book often contradicts itself. Review questions are not also based on material from the current edition as the industry has changed but the the book uses the same questions from previous editions of the book. even when the subject asked is not discussed in most recent edition. there are typos and other issues key terms in the chapters don't have a definition in the glossary the list goes on. Schools should not use Sean Bennett books there are better books out there however we are stuck with this one.

This book is basically 5th edition with new pictures. It even has all of the same technical errors. In many circumstances the end of chapter review questions directly contradict the chapter text.

I've been using this book for three semesters, I've never had a problem with it.

very detailed coverage of subject, recommended to read together with medium/heavy duty truck engine, fuel and computerized management system, these 2 books will give u a solid foundation on diesel vehicle,happy

I didn't guess that it would arrive so soonGreat thanks

On time and meet my expectations.

Came in great condition, very happy with it.

Great price for new! Shipping was fast
