Customer Reviews

Spending a working life with the Royal Naval Scientific Service and its successor organizations, Bernard Ireland gained experience in many aspects of naval research. In a parallel career, he has acted as freelance technical illustrator to major shipping companies and other organizations. He has written many books on maritime technology and history. John Parker has written more than 35 books published in over 75 editions worldwide, including many acclaimed military and investigative projects and high-profile biographies.

Great book, very detailed with excellent photographs of ships, and detailed history behind each class. Highly recommend for any naval enthusiast.

I wish this book was in a larger size such as 11 x 9 or bigger in order to make the font size easier to read along with bigger photographs to admire of all these warships and subs. I ended up buying another book about warships that had everything I was looking for although it was copyrighted in 2006.

Bought this for my Father for his Birthday. He loved it!!

The book gives a basic coverage of destroyer and submarine history and development, this is a huge amount of material, and the book could easily be twice the size to really cover the vast number and classes of ships involved.

I shop yearly for special books for our son for Christmas. This is one of them and he really liked it. Interesting and learns many things about military aircraft.

This book is full of facts & history if you like that sort of thing Well put together and an easy reference

great
