Readings In Risk

Synopsis

Developed for use as a reference work in graduate and undergraduate courses as well as for researchers, policymakers, and interested laypersons, the book is a unique collection of authoritative yet accessible journal articles about risk. Drawn from a variety of disciplines including the physical and social sciences, engineering, and law, the articles deal with a wide range of public policy, regulatory, management, energy, and environmental issues. The selections are accompanied by introductory notes, questions for thought and discussion, and suggestions for further reading.

Customer Reviews

'A very practical and realistic publication.' Chemical and Engineering News 'Could form the basis for a course in risk analysis. Little mathematical background is required, and each paper is followed by a set of questions for discussion. . . An excellent text to teach from.' American Scientist 'Compiles the seminal essays on risk issues. . . presented in a convenient, objective, simple, and stimulating manner. . . . Its organization, selection of papers, and concise but provocative introductory essays make it an understandable and desirable resource for a nontechnical audience. . . . Has its greatest value as a classroom tool.' Environmental Science and Technology

Theodore S. Glickman is a senior fellow in the Center for Risk Management at Resources for the Future. Michael Gough is a senior fellow and director of the Center for Risk Management at

Resources for the Future.
