Guidelines For Postrelease Mitigation Technology In The Chemical Process Industry

Synopsis

This book puts together a body of very recent information never before presented in one volume on the design of post-release mitigation systems. The development of a fundamental knowledge base on post-release mitigation systems, through testing and data correlation, is very new. While further research and development is needed, this practical work offers guidance on putting post-release countermeasures to work now. The book presents current engineering methods for minimizing the consequences of the release of toxic vapors, or ignition of flammable vapors, including passive and active systems intended to reduce or eliminate significant acute effects of a dispersing vapor cloud in the plant facility, or into the surrounding community. As in all CCPS works, the book emphasizes planning and a systems approach, shows limitations of any methods discussed, and provides numerous references so that the reader may continue to learn.

Book Information

Hardcover: 175 pages

Publisher: Wiley-AIChE; 1 edition (December 15, 1996)

Language: English

ISBN-10: 0816905886

ISBN-13: 978-0816905881

Product Dimensions: 6.3 x 0.7 x 9.6 inches

Shipping Weight: 15.2 ounces (View shipping rates and policies)

Best Sellers Rank: #4,366,988 in Books (See Top 100 in Books) #87 in Books > Science & Math > Chemistry > Safety #1863 in Books > Engineering & Transportation > Engineering > Industrial, Manufacturing & Operational Systems > Health & Safety #1868 in Books > Science & Math > Technology > Safety & Health

Customer Reviews

The CENTER FOR CHEMICAL PROCESS SAFETY (CCPS), an industry technology alliance of the American Institute of Chemical Engineers (AIChE), has been a world leader in developing and disseminating information on process safety management and technology since 1985. CCPS has published over 80 books in its process safety guidelines and process safety concepts series. For more information, visit www.ccpsonline.org.
