Customer Reviews

Jason Potash is an aspiring artist who loves to draw and produce patterns and designs which are meditative and relaxing in nature , not only for him but also to share with you.

I am very disappointed with the quality of this coloring book. I was getting this for my mom and my sister to share because they are obsessed with the new coloring craze and they both love birds. The quality of this book is terrible. I can't believe I even paid for it. I'm almost positive I could go to any craft store (or Dollar Store) and find a better quality book. The only positive of the book is the pages are very high quality (i.e. if you like to use gel pen or fine tip markers) and the ink won't bleed thru. But other than that, there is nothing good about this book. There are a total of 25 pages worth of coloring material (all of the coloring page designs have a blank back except for the first coloring page that has a line for you to put your name on). There are hundreds of different species of birds

and the book only focuses on a couple breeds (i.e. tons of owls and humming birds). As far as design goes, the pictures look very pixelated. It looks as though the drawings were originally much smaller then expanded just to fit the size of the page. (Similar to finding a small picture on the internet, copying and pasting it too Word/PowerPoint, expanding the photo then realizing the bigger picture is fuzzy. Sorry if that is a little confusing, it's the only way I knew how to explain it.) There is also no consistency between the design of the birds. It's very visible that there were at least five different designers to create the drawings found in the book. Now I know what you're probably thinking, "isn't having different designs a good thing?" Not so in this book. Some of the designs look like they were designed for little kids while others look professional. Some are easy while others have such intricate designs even my sister who has good eyesight can't do. Also, the title "BIRDS" really does mean just birds. The designs are only of birds. No flowers or scenery, just birds, despite what the cover may have you believe. I really hate to write bad reviews for products but this was worth it. The quality of coloring books that you can find at your local craft store are much better than this and a better price as well! Don't waste your hard earned money on this!

The cover is very deceptive. You think the book is full of scenes similar to the cover, but instead, there are single cartoon-like birds (pelicans, toucans, storks, parrots) on a blank white page. There are 3 pages out of 25 that I MIGHT enjoy coloring. Most pictures are highly pixelated, and they look like they have been taken from a clip art and blown up bigger. Had I'd been able to see a couple of the coloring pages, I would not have bought it. I would not consider giving this to an adult to color.

Each page has one bird - seems very simple - more like for a child.

very good

gift

I love it

Very dissapointed in both of the books I have just received mainly the bird one if I had been able to veiw the inside I would not have bought this. The printing is blurred and in other places the design is crowded

My wife really likes it..
