Nu-Oncology; Cancer Prevention And Anti-Aging (Volume 1)

Synopsis

Nu-Oncology vol. 1 details out a definitive nutritional inclusion plan to markedly reduce your odds of getting cancer, to protect you from getting stricken with non-infectious diseases, and to dramatically slow the aging process. This book fully explains the science of how this protocol will reduce your risk of cancer while also being enjoyable to read. It is an appropriate read for anyone high school age and older. The protocol focuses on the "Essential Eight" and how these often trace molecules are having such a profound impact on our health. These molecules which are rare in most foods are super-produced and/or concentrated by a few select foods. By adding just small amounts of these select foods marvelous non-infectious disease fighting mechanisms go into action. The human body was designed to work together with these molecules to fight off disease (as is fully detailed out within the book). The colon health portion of the book really applies to everyone, but especially for persons with IBS, UC, or Crohn's. It has easily and successfully been used to treat and cure long-standing UC where Western Medicine had failed, all in a side-effect free manner. America has the highest cancer incidence in the world (by a huge margin). It's time we all become pro-active at protecting ourselves and our family from the ravages of cancer. Reduce your body's fibrosis, lower your cholesterol naturally, protect yourself from dementia and Alzheimers. It's all within the anti-aging portions of the book (with the heaviest focus being cancer prevention). Women, this book focuses intensely on breast and colon cancer prevention, two of the most common types of cancer in women.

Book Information

Series: Nu-Oncology

Paperback: 322 pages

Publisher: Nu-Oncology Press, Inc. (March 23, 2017)

Customer Reviews

This book is a life changer!! The information contained herein, is invaluable. Indeed, it's revolutionary and ahead of it's time though not surprisingly, it confirms thousands of years of medical knowledge spread across many cultures. If you've ever wondered why people ate...and continue to eat...certain foods in various cultures around the world, this book explains. What is interesting, is that we in America used to eat some of the same foods, or foods that had similar chemical properties and effects. Indeed, our grandparents would be familiar with many of the foods that have disappeared from our modern diet. Dr. Crawford makes the case for adding these foods back in and how it will dramatically change our health. The correlation between the foods and the prevention and treatment of cancer that Dr. Crawford outlines, are thoroughly supported by the scientific evidence. Indeed, this book is the most comprehensive examination and compilation of foods that studies have already proven to be effective in treating a wide variety of conditions, not only cancer. Dr. Crawford's book also highlights the less obvious connections, is extensively referenced with studies from mainstream science journals, plus it gives consumers a "user friendly" guide for improving immune health and reducing inflammation. The foods that he emphasizes-the essentials-are in most cases, delicious and easy to add to one's diet...and unlike many meds, have few if any negative side effects.

Nu-Oncology is a research-based book that is a must-have for all who want to reduce the risk of cancer. Dr. Crawford has done an astounding amount of research which gives credibility to his theories and suggestions for dietary applications. This book contains both highly technical information and clearly written suggestions for what to eat, how often, and how much; this allows the non-technically inclined reader to absorb as much or as little of the technical material as desired and to move on to the practical information. As part of Dr. Crawford's discussion, he explains why conventional chemotherapy and radiation therapies on their own are not the answer for completely curing cancer. This book is a handbook to be read, re-read, marked, tabbed, and used as an on-going resource. An especially valuable part of this book is the final chapter, which contains a summary of what to eat if you want to reduce the risk of cancer in your life or the life of a loved one!

Nu-Oncology is the MUST read book of the year. Words like "great, exceptional, fantastic" are thrown around in reviews all the time. This book goes way beyond any of those adjectives. This is life we're talking about and Dr. Ken's brilliant scientific mind has figured out such crucial pieces for us each to live a longer and much healthier life. My 30 year old brother cannot put the book down. He loves it as much as I do. As he put it, "I don't want to save all of this money for retirement and not be able to enjoy it." My grandmother is following the program. She loves it, and at 92 years of age this program has turned her into a spring chicken. It's quite simply like this program enables the body to function and work to its maximum potential. The super-nutrient inclusive program is so on target. No drugs, no tough exclusive dieting. Just adding the select super foods (that I never in a million years would have guessed). You won't find this information anywhere else. Take my advice and definitely read this book. Guys, Chapter 27 is for you. Bye-bye little blue pill.

DR Ken Crawford is amazing with his new Diet approach to treating cancer. Would recommend this book to anyone wanting to help keep their body resistant to disease or helping care for a cancer patient. NOT A CURE BUT HELPS LONGEVITY WITHOUT CHEMICALS.

An absolute must read for anyone who has been touched by cancer. And that probably is everyone. The research Dr. Crawford has put into his research is amazing and he has written it in terms that are easy to understand. His program involves very simple additions to your diet to prevent cancer. Why would anyone not want to try it. It's awesome!

This is must read for everyone! Dr. Ken has done all the research for us to reap all the benefits. I recommend his books to everyone! Thanks Dr. Ken!
