Age Range: 2 - 5 years

Grade Level: Preschool - Kindergarten

## Customer Reviews

"With bright backgrounds and crisp photos, the small volumes pack in a good deal of information...Fun and informative." - School Library Journal

When it launched in 2007, National Geographic Little Kids magazine became an instant success, and has won many early education kudos including the coveted Golden Lamp and the Parents' Choice Award. Circulation has reached 327,000. Parents have come to rely on the magazine for entertaining and educational content for young children. Additionally, over the next couple of years there is going to be a spike in the number of preschool-aged kids, widening the market for more Little Kids-branded products.

Thought this was going to be a truck book but turns out it is about various things that can dig (a dog digging in dirt, a child digging in sand, people planting flowers, etc.). My 2.5yo still liked it even

though it wasn't what we expected.

Love this book for little boys (or girls). Gave it as a gift to my nephew (3 yrs) and he loves to look at all the pictures. It will serve him well as he gets older and can actually read it. Good price for the book. Would purchase again!

Super book for my grandsons. They love it

Grandson loved it. Actually, I found it interesting too. Gma

All the National Geographic books are excellent learning tools.
